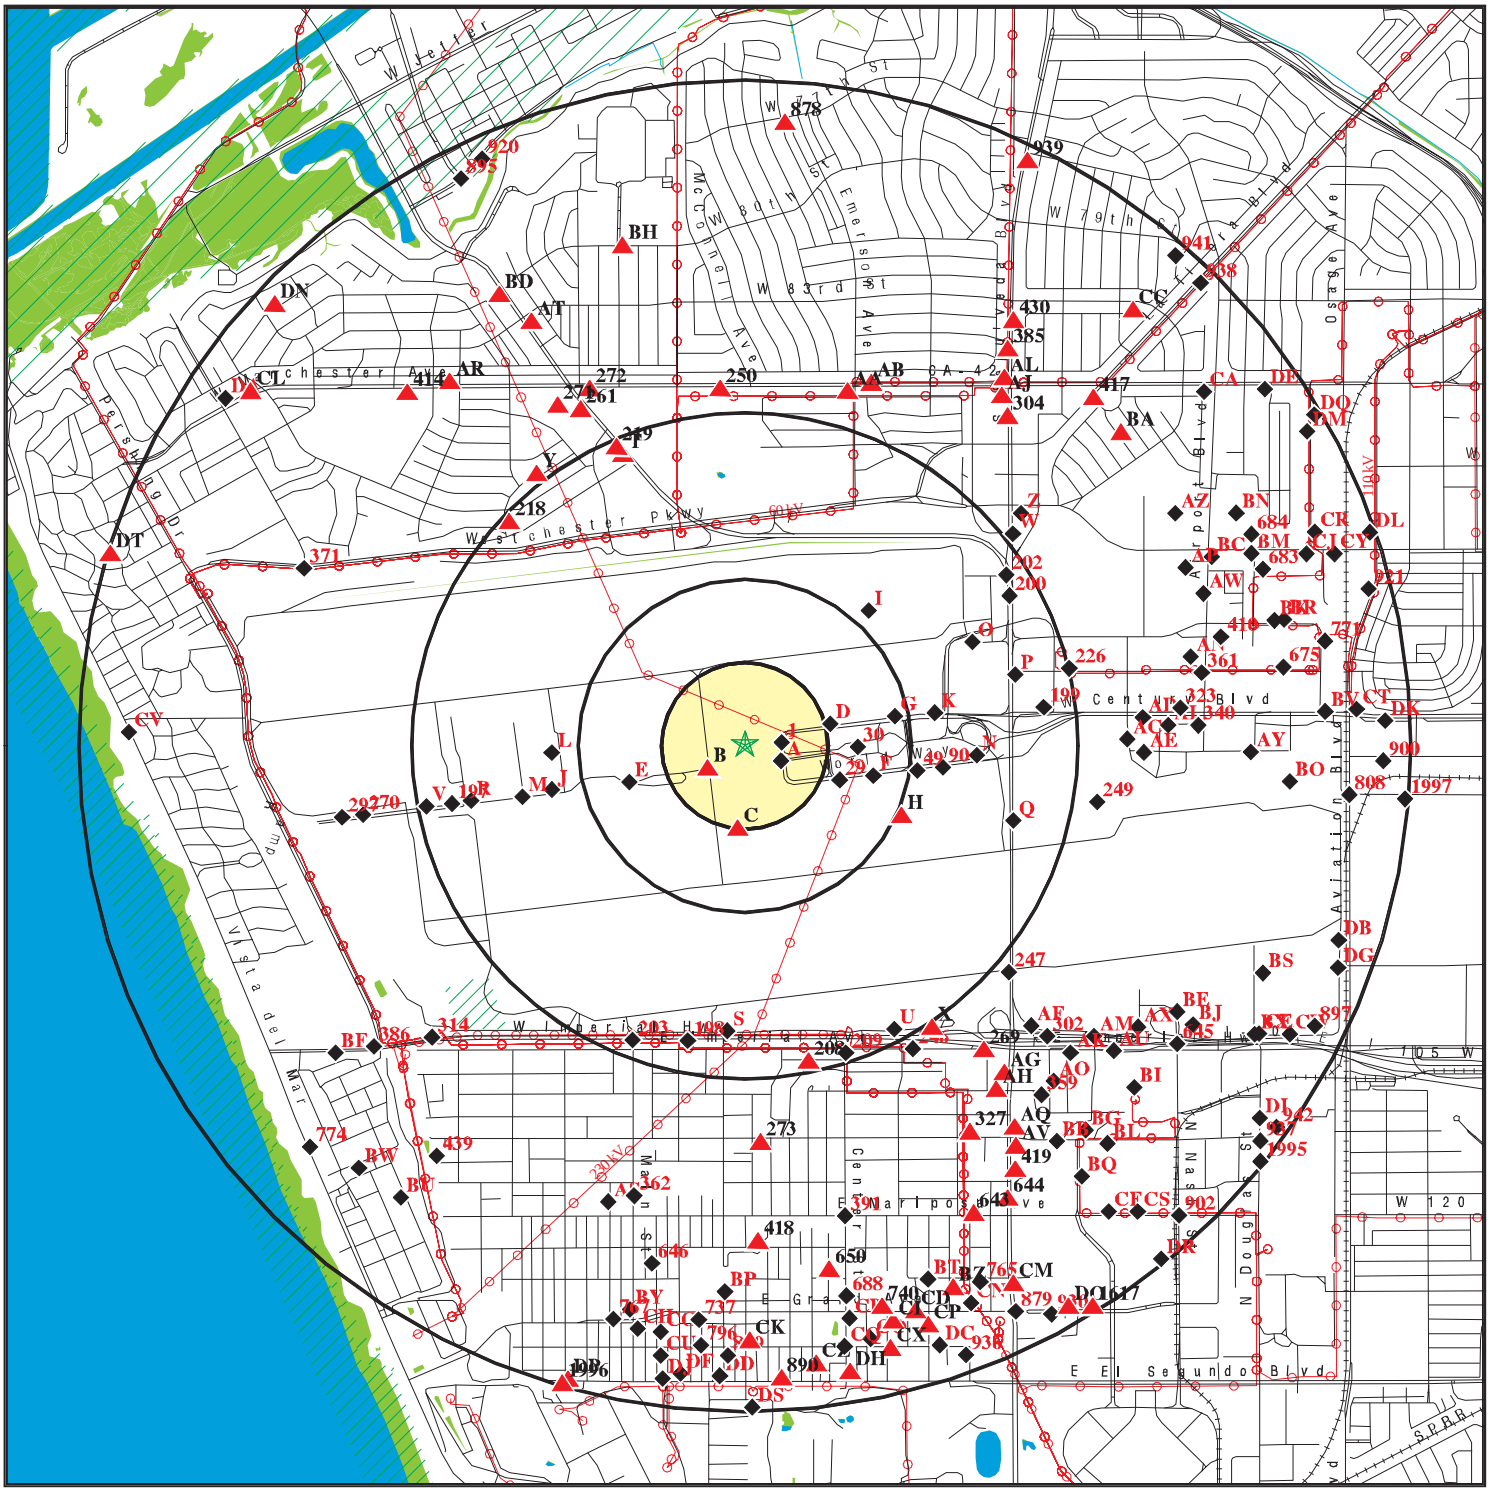
OVERVIEW MAP - 5703177.1S



- Target Property
- Sites at elevations higher than or equal to the target property
- Sites at elevations lower than the target property
- Manufactured Gas Plants
- National Priority List Sites
- Power transmission lines
- 100-year flood zone
- 500-year flood zone
- National Wetland Inventory
- State Wetlands

This report includes Interactive Map Layers to display and/or hide map information. The legend includes only those icons for the default map view.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL ---------- National Priority List
Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Federal CERCLIS list

FEDERAL FACILITY ---------- Federal Facility Site Information listing

State- and tribal - equivalent NPL

CA RESPONSE ---------- State Response Sites

State and tribal leaking storage tank lists

INDIAN LUST ---------- Leaking Underground Storage Tanks on Indian Land

State and tribal Brownfields sites

CA BROWNFIELDS ---------- Considered Brownfieds Sites Listing

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS ---------- A Listing of Brownfields Sites

Local Lists of Landfill / Solid Waste Disposal Sites

INDIAN ODI ---------- Report on the Status of Open Dumps on Indian Lands
ODI ---------- Open Dump Inventory

Local Lists of Hazardous waste / Contaminated Sites

CA HIST Cal-Sites ---------- Historical Calsites Database

EXECUTIVE SUMMARY

Local Land Records

CA LIENS ---------- Environmental Liens Listing
LIENS 2 ---------- CERCLA Lien Information

Records of Emergency Release Reports

CA MCS ---------- Military Cleanup Sites Listing

Other Ascertainable Records

EPA WATCH LIST ---------- EPA WATCH LIST
ROD ---------- Records Of Decision
PRP ---------- Potentially Responsible Parties
CONSENT ---------- Superfund (CERCLA) Consent Decrees
UMTRA ---------- Uranium Mill Tailings Sites
LEAD SMELTERS ---------- Lead Smelter Sites
US MINES ---------- Mines Master Index File
CA BOND EXP. PLAN ---------- Bond Expenditure Plan
CA MINES ---------- Mines Site Location Listing
CA WASTEWATER PITS ---------- Oil Wastewater Pits Listing
CA WIP ---------- Well Investigation Program Case List
CA OTHER OIL GAS ---------- OTHER OIL & GAS (GEOTRACKER)

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP ---------- EDR Proprietary Manufactured Gas Plants

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/25/2019 has revealed that there are 4

CORRACTS sites within approximately 2 miles of the target property.

Federal ERNS list

ERNS: The Emergency Response Notification System records and stores information on reported releases of oil and hazardous substances. The source of this database is the U.S. EPA.

A review of the ERNS list, as provided by EDR, and dated 03/25/2019 has revealed that there are 968 ERNS sites within approximately 2 miles of the target property.

State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which

there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 04/29/2019 has revealed that there are 33 CA ENVIROSTOR sites within approximately 2 miles of the target property.

State and tribal leaking storage tank lists

CA LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA LUST list, as provided by EDR, has revealed that there are 97 CA LUST sites within approximately 2 miles of the target property.

CA CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA CPS-SLIC list, as provided by EDR, has revealed that there are 43 CA CPS-SLIC sites within approximately 2 miles of the target property.

State and tribal voluntary cleanup sites

CA VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the CA VCP list, as provided by EDR, and dated 04/29/2019 has revealed that there are 8 CA VCP sites within approximately 2 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

CA SCH: This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category. depending on the level of threat to public health and safety or the. environment they pose.

A review of the CA SCH list, as provided by EDR, and dated 04/29/2019 has revealed that there are 2 CA SCH sites within approximately 2 miles of the target property.

CA CHMIRS: The California Hazardous Material Incident Report System contains information on reported hazardous material incidents, i.e., accidental releases or spills. The source is the California Office of Emergency Services.

A review of the CA CHMIRS list, as provided by EDR, and dated 10/24/2018 has revealed that there are 359 CA CHMIRS sites within approximately 2 miles of the target property.

CA SPILLS 90: Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

A review of the CA SPILLS 90 list, as provided by EDR, and dated 06/06/2012 has revealed that there is 1 CA SPILLS 90 site within approximately 2 miles of the target property.

EXECUTIVE SUMMARY

2020 COR ACTION: The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

A review of the 2020 COR ACTION list, as provided by EDR, and dated 09/30/2017 has revealed that there are 2 2020 COR ACTION sites within approximately 2 miles of the target property.

US AIRS: The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

A review of the US AIRS list, as provided by EDR, has revealed that there are 12 US AIRS sites within approximately 2 miles of the target property.

EXECUTIVE SUMMARY

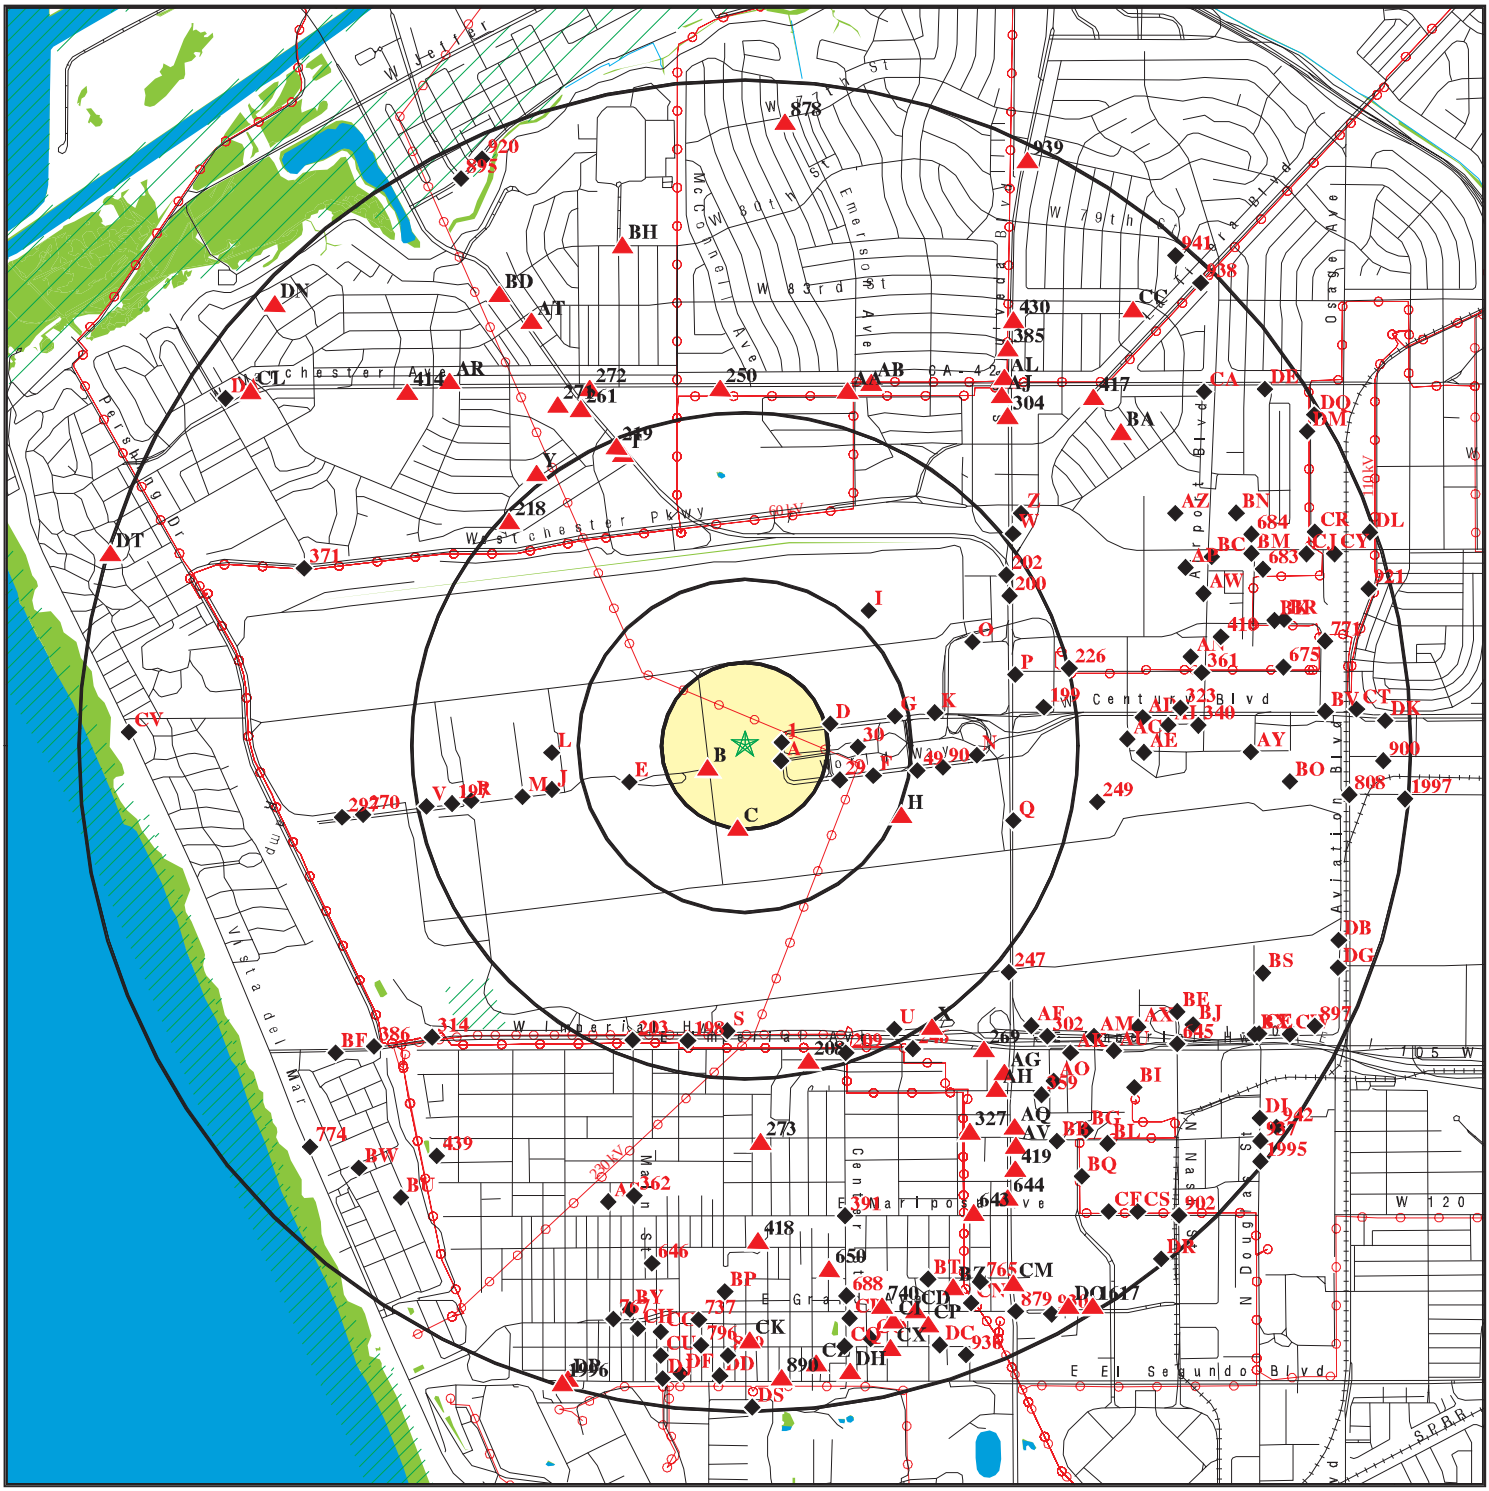
Due to poor or inadequate address information, the following sites were not mapped. Count: 6 records.

Site Name	Database(s)
CITY OF EL SEGUNDO	CA LUST, CA HIST CORTESE
DOD - LOS ANGELES AIRFORCE BASE	CA CPS-SLIC
JONDA ENTERPRISES	CA CPS-SLIC
LAXFUEL - BFSF	CA CPS-SLIC
LOS ANGELES AIR FORCE STATION	CA BOND EXP. PLAN
BNSF HR-LA-C-GET-HB-3/HB-4	CA ENVIROSTOR

OVERVIEW MAP - 5703177.1S



- Target Property
- Sites at elevations higher than or equal to the target property
- Sites at elevations lower than the target property
- Manufactured Gas Plants
- National Priority List Sites
- Power transmission lines
- 100-year flood zone
- 500-year flood zone
- National Wetland Inventory
- State Wetlands

This report includes Interactive Map Layers to display and/or hide map information. The legend includes only those icons for the default map view.

Preparer of Incident Report:	Carrier
Description of Events:	PASSENGER ELIAS GROSS CHECKED HIS BAGS WITH A SKYCAP AT 1927/21AUG FOR FLIGHT 1171 TO HARTFORD (BDL) BAG TAG NBR: AA443029 AA443030. AS THE BAGS MADE ITS WAY TO THE BAG PIER #4 CLERK TIMOTHY SCHIRO NOTICED A BLACK HARD SIDE BAG (TAG AA443029) EMITTING WHITE SMOKE (APPROX TM : 1939). MANAGER ON DUTY WAS CALLED AS WELL AS THE CONTROL CENTER. AN E-CIGARETTE CONTAINING LITHIUM BATTERIES IGNITED IN THE BAG AND FIRE DEPARTMENT AND AIRPORT POLICE WAS CALLED TO THE SCENE. THE E-CIGARETTE APPEARED TO HAVE BEEN STILL ATTACHED TO THE CHARGER BASE. FIRST REPONDERS WERE OFFICER MORENO AND OFFICER MORA OF THE AIRPORT POLICE. THE SECOND RESPONDERS WERE LAFD UNIT #51. BAGS WERE TAKEN TO THE CUSTOMER SERVICE MANAGER'S OFFICE AND THEN LATER RELEASED BY CORPORATE SECURITY.
Recommendations/Actions Taken:	THE SKYCAP WHO CHECKED THE PASSENGER IN WAS INVESTIGATED AND ASKED IF THE HAZARDOUS MATERIALS QUESTIONS WERE ASKED. HE COULD NOT RECALL. AMERICAN AIRLINES CONTINUES TO PERFORM ITS OWN SELF AUDITS MONTHLY TO ENSURE THE HAZMAT QUESTIONS ARE ASKED AT THE CURB TICKET COUNTER AND GATES.

Description of Events:	SHIPMENT OF U.S.MAIL. DISCOVERED DURING OFFLOADING OF FLIGHT 1578

22 BROOKLINE DRIVE (Continued) **2017010135**

FROM CHICAGO. UPON OFFLOADING OF THE A1 COMPARTMENT EMPLOYEE DISCOVERED A NOXIOUS ODOR FROM THE MAIL SACKS. DURING FURTHER INVESTIGATION A BOX SATURATED WITH LIQUID WAS DISCOVERED IN ONE OF THE MAIL SACKS. AIRCRAFT MAINTENANCE WAS CALLED TO INSPECT THE CARGO COMPARTMENT AS THE SMELL LINGERED. THE BOX DISCOVERED CONTAINED 4 DENTED CANS OF MIXING COMPOUND/URETHANE. 1 QUART WAS EMPTY ANOTHER QUART CAN WAS HALF FULL. THE LIQUID HAD GOTTON ONTO THE OTHER US MAIL BOXES. THE FLEET SERVICE CLERK COMPLAINED OF NAUSEA AND WAS TAKEN TO THE LOCAL AMERICAN AIRLINE MEDICAL FACILITY TO BE EXAMINED. THE MAIL SACKS WERE TAKEN AWAY BY THE AIR CARGO AND USPS INSPECTOR- T. CABRERA WAS NOTIFIED. AMERICAN AIRLINES FLIGHT 220 TO BOSTON WAS DELAYED AS THE CAPTAIN WANTED TO ENSURE THE SMELL DISSIPATED. THE PLANE DEPARTED WITH ALL SAFETY MEASURES TAKEN. THE SHIPMENT DID NOT CONTAIN ANY HAZARD LABELS- UN # ORIENTATION LABELS NOR UN BOX WAS USED. NO MSDS INCLUDED IN SHIPMENT.

Report #:	2007080173
System ID:	434132
Report type:	A
Incident site:	400 World Way LAX LOS ANGELES, CA 90045
Incident county:	LOS ANGELES
Incident country:	US
Incident date:	07/12/07
Incident time:	0800
NRC report #:	0
Other fed agency reported to:	Not reported
Other agency report #:	Not reported
Incident foreign country:	Not reported
Transportation mode:	1
Transportation phase:	262
Carrier DOT ID:	Not reported
Carrier Hazmat ID:	Not reported
Carrier name:	American Airlines, Inc
Carrier address:	P.O. Box 92246 LOS ANGELES, CA 90009
Carrier country:	US
Incident consequence:	Vapor released
EMS/Fire crew responded:	False
EMS/Fire crew report #:	Not reported
Police responded:	False
Police report #:	Not reported
In-house cleanup occurred:	False
Other cleanup occurred:	True
Estimated damages exceed $500:	False

400 WORLD WAY LAX (Continued) **2008434132**

Value of material lost: 0
Value of carrier loss: 0
Value of pub/priv property loss: 0
Response cost: 0
Remediation cost: 0

Details of fatalities by vapor/fire/explosion of hazardous material:
Did Fatalities occur: False
No. of employee fatalities: 0
No. of responder fatalities: 0
No. of public fatalities: 0

Details of fatalities not due to hazardous material:
Did fatalities occur: False
No. of dead persons: 0

Details of injuries due to hazardous material:
Did injuries occur: False
No. of employees hospitalized: 0
No. of employees not hospitalized: 0
No. of responders hospitalized: 0
No. of responders not hospitalized: 0
No. of public hospitalized: 0
No. of public not hospitalized: 0
Evacuation was required: False
No. of employees evacuated: 0
No. of public evacuated: 0
Total number evacuated: 0
Evacuation time in hours: 0
Road/facility was closed: False
No. of hours closed: 0
Hazmat invloved in crash/derailment: False
Estimated speed of crash: 0
Crash weather conditions: Not reported
Vehicle overturned: Not reported
Did vehicle leave road/track: Not reported
Where incident occurred/discovered: 5
Shipment handling details: Shipment was on a commercial passenger aircraft, Shipment had not been transported

Incident report preparer details:
Preparer name: Jay Valenzuela
Preparer title: Environmental Manager
Hazmat registration ID: Not reported
Employer business name: American Airlines, Inc.
Address: P.O. Box 92246
LOS ANGELES, CA 90009
Country: US
Report date: 08/10/07
Telephone: 310-646-4420
Fax: 310-646-7549
Business type: C
Preparer other function: Not reported

Description of Events:

A fuel odor from the passenger’s bag/box warned the baggage loader of a possible spill. The EC opened the box to learn that the cap of the aerosol can was off and the top leaned against clothing, thus

400 WORLD WAY LAX (Continued) **2008434132**

causing the release. It is estimated that about 1 ounce of the product released. There were no signs of the release with the exception of the odor.

Recommendations/Actions Taken to Prevent Future Incidents:
Mr. Vant La was explained the reasons for not carrying such products in passenger baggage. The 11 aerosol cans were confiscated. The passenger and his bags were released to him.

Shipper Details:

Shipper ID:	434518
Shipper name:	Vant La
Address:	Unknown
	UNKNOWN, N/A
Shipper country:	VN
Hazmat papers #:	Not reported
Shipment origin:	Not reported
	Not reported
Shipment origin country:	US

Details of material being shipped:

Material ID:	440649
Material name:	FLAMMABLE GAS IN LIGHTERS
UN ID:	UN1057
Hazard class code:	21
Trade name:	Sun Flame Butane Gas
Packing group:	Not reported
Amount reported released:	1 Milliliter(s)
Amount released:	0 Milliliter(s)
Material listed as hazardous waste:	False
EPA manifest number of haz. waste:	Not reported
Material listed as toxic inhalant:	True
Hazard zone of toxic inhalant:	1
Material shipped under exemption/ approval/ Competent Authority Cert.	
	False
Exemption/approval/CAC number:	Not reported
Undeclared Hazmat shipment:	True
Package ID:	441066
Hazmat shipment destination:	Not reported
	Orlando, CA
Package type:	A
Package other description:	Not reported
Packaging markings:	DOT 2P DOT REG. M4981
Package code:	185
Radioactive packaging indicator:	Not reported
Radioactive cert. indicator:	Not reported
Radioactive cert. No:	Not reported
Rad. nuclide(s) present:	Not reported

Description of Events:

FLIGHT 1423 FLEW FROM STL-ST. LOUIS, MO TO LAX-LOS ANGELES, CA ABOARD AIRCRAFT NUMBER 4YS ON 06/04/08. THE SINGLE PAPER BOX OF POP POP SNAPPERS WAS DISCOVERED WHILE OFFLOADING PASSENGER BAGS. WHICH PASSENGER
BAG THE BOX FELL FROM COULD NOET BE DETERMINED. THE BOX OF 50 PIECES OF SNAPPERS (POPS WHEN THROWN HARD ON GROUND) WAS FOULD OPEN AND 8 PIECES ON THE AIRCRAFT CARGO HOLD FLOOR. THE PEICES WERE IDENTIFIED AS FIREWORKS COMING FROM THE BOX. A COMPLETE SEARCH OF THE AIRCRAFT CARGO HOLD WAS CONDUCTED. THE 8 PIECES WERE RETURNED TO THE BOX.

Recommendations/Actions Taken to Prevent Future Incidents:

Fireworks were not disclosed by the passenger nor were they identified during the screening process.

Incident Date:	04/09/2015
Admin Agency:	Los Angeles City Fire Department
Amount:	Not reported
Contained:	Yes
Site Type:	Not reported
E Date:	Not reported
Substance:	Sewage
Quantity Released:	150
Unknown:	Not reported
Substance #2:	Not reported
Substance #3:	Not reported
Evacuations:	Not reported
Number of Injuries:	Not reported
Number of Fatalities:	Not reported
#1 Pipeline:	No
#2 Pipeline:	No
#3 Pipeline:	No
#1 Vessel >= 300 Tons:	No
#2 Vessel >= 300 Tons:	No
#3 Vessel >= 300 Tons:	No
Evacs:	No
Injuries:	No
Fatals:	No
Comments:	Not reported
Description:	Caller states terminal 5 sewer main overflowed on to the road in the U.S. Customs Inspection Area and into a fan room. Caller states inner roadway between terminal 4 & terminal 5 was closed with barricades manned by a police officer. Caller states changeable message signs were requested.

Comments:	Not reported
Description:	A fuel hydrant system malfunctioned resulting in a Jet A fuel spill to an airport ramp (concrete). Of the 50 gallons that was spilled, an estimated 1 1/2 gallons entered a storm drain. No fires or injuries were reported. On-site personnel performed a cleanup of the ramp and the storm drain without further incident.

Description of Events:	FLIGHT DATE 16 JANUARY 2017 FLIGHT 1097 (RDU-LAX) AIRCRAFT: B737-800 (SHIP 3740) TIME APPROXIMATELY 1.5 HOURS PRIOR TO LANDING (0900 PST) ON 1030 PST PHASE OF FLIGHT: CRUISE 2 FLIGHT CREW 4 FLIGHT ATTENDANTS 137 PASSENGERS. PRELIMINARY DETAILS (SUBJECT TO CHANGE) ACCORDING TO THE FLIGHT ATTENDANTS WHILE IN CRUISE APPROXIMATELY AN HOUR AND HALF PRIOR TO LANDING THE PASSENGER FROM SEAT 17 F BROUGHT A BATTERY CHARGER TO THE GALLERY. THE CHARGER HAD OVERHEATED AND BEGAN TO SMOKE. AT THE TIME THE CHARGER WAS PLACED ON THE GALLERY FLOOR AND A HALON FIRE BOTTLE WAS EXTINGUISHED ON IT. THE CHARGER WAS THEN PLACED INTO THE CONTAINMENT BAG AND WATER WAS POURED OVER IT; THE CHARGER CONTINUED TO SMOKE FOR APPROXIMATELY 15 MINUTES THE FLIGHT CONTINUED TO LAX WITHOUT FURTHER INCIDENT. AIRCRAFT RESCUE AND FIREFIGHTER (ARFF) PERSONNEL MET THE AIRCRAFT AT THE GATE AND INSPECTED THE CHARGER ARFF DEEMED THE CHARGER TO NO LONGER BE A HAZARD AND IT WAS RELEASED BACK TO THE PASSENGER.

Description:	The Central Plant at LAX airport received an alarm from an underground pipeline indicating a release. The fuel went to the secondary containment area but that was not secure allowing the fuel to leak to the soil. An airport contractor is on scene ddetermining cleanup and extent of soil contamination.

Preparer of Incident Report:	Carrier
Description of Events:	JUST AFTER PUSH-BACK FROM GATE 51A AT LAX A PASSENGERS VAPE PEN/BATTERY STARTED TO CATCH FIRE WHILE LOCATED UNDERNEATH THE SEAT SCORCHING PASSENGERS BACKPACK AND CARPET OF THE AIRCRAFT IN THE AREA OF EVENT. VAPE PEN AND BATTERY WERE EXTINGUISHED USING A FIRE EXTINGUISHER ON-BOARD THE AIRCRAFT. AIRCRAFT RETURNED TO GATE AND WAS MET BY LAX FIRE DEPARTMENT. PASSENGERS DEPLANED WITHOUT INCIDENT AND SWAPPED AIRCRAFT TO CONTINUE FLIGHT. PASSENGER WAS ALLOWED TO TRAVEL ON THE SWAPPED FLIGHT AS IT WAS DETERMINED TO BE A NO-FAULT SITUATION.

Preparer of Incident Report:	Carrier
Description of Events:	SHIPPER ANA TRADING CORP USA INFORMED US ANA THAT THEY ARRANGED AN AIR SHIPMENT WHICH INCLUDED DG ITEMS UNDECLARED WITH OUR PASSENGER FLIGHT. HOWEVER NO TROUBLE WAS CAUSED BY THE INCIDENT DURING THE TRANSPORTATION. 06/02/2010 THE "SHIPPER " ANA TRADING CORP USA (TORRENCE CA 90502) PLACED A PURCHASE ORDER TO "ORIGINAL SHIPPER " THE LIGHT BRIGADE (TUKWILA WA 98088) FOR THE CLEANING KIT AND REQUESTED THEM TO FILL OUT AND SIGN ON ITS OWN DG STATEMENT FORM. SHIPPER RECEIVED THE KIT PRODUCT ABOUT TWO WEEKS LATER. 06/22/2010 SHIPPER CONFIRMED THAT IT WAS NON-DG WITH ORIGINAL SHIPPER BY PHONE. SHIPPER REQUESTED THEM TO FILL OUT THE FORM AND SEND IT ONCE MORE. 06/23/2010 SHIPPER PROCEEDED AN AIR TRANSPORTATION FROM LAX TO NRT (NARITA AIRPORT JAPAN) WITH AWB:205-0725 2711 (EXHIBIT B) ONBOARD OUR FLIGHT#: NH005. SHIPPER RECEIVED THE SIGNED DG STATEMENT MENTIONED ABOVE (EXHIBIT A). THE KIT PRODUCT ARRIVED AT NRT FOLLOWING DAY. 08/09 - 13/2010 UPON A REQUEST FROM "CONSIGNEE " ANA TRADING CO. LTD (TOKYO JAPAN) SHIPPER REQUESTED THE ORIGINAL SHIPPER TO PROVIDE ALL THE APPLICABLE MSDS FOR THE KIT COMPONENTS AND LET THEM MAKE SURE THAT THE KIT WAS NON-DG. THEN THEY CONFIRMED THAT THE KIT WAS NON-DG. 08/13 - 16/2010 AFTER HAVING MSDS (EXHIBIT C) REVIEWED SHIPPER CONCLUDED THAT ONE OF THE COMPONENTS (CANNED AIR) WAS REGULATED BY IATA DGR AS "CONSUMER COMMODITY " CLASS 9 MISCELLANEOUS ID#8000 AND REPORTED IT TO CONSIGNEE. 08/17/2010 CONSIGNEE INFORMED OUR TOKYO OFFICE THE CONCLUSION MENTIONED ABOVE. 08/19/2010 SHIPPER OFFICIALLY INFORMED US (LAX OFFICE) THE CONCLUSION MENTIONED ABOVE.
Recommendations/Actions Taken:	ANA has met with and insisted to our company material shipper ANA Trading Corp USA to rigidly check all the applicable MSDS to make sure there is no hidden DG included when "Kit" or "Set" products with multiple components are received. Otherwise these products will not be accepted for air transporta

Description:	Quoting the NRC report, "Caller reported that 2-5 gallons of jet fuel sprayed out of a tank onto the ground and into a storm drain. This was due to a pressure relief valve on a loading rack that gave out on the system." Under REMEDIAL ACTIONS the report goes on to state, "Adjusted the settings on the pressure relief valves, a contractor (Ocean Blue Environmental Services) was hired for a clean up."

Site History:	LAX FUEL-BFSF-TRANSFERRED FROM FORMER LUST CASE NO. 900450134. LAXFUEL-BFSF-TRANSFERRED FROM FORMER LUST CASE NO. 900450189. RUN OFF HOSE FROM SEPARATOR DISCHARGED JET "A" FUEL INTO GROUND- VISIBLE LEAKS FROM FILTER #3 FAIL PRCISION TEST. PIPES NOH #039042 ISSUED FOR SITE ASSESSMENT - LAX FUEL-BFSF-TRANSFERRED FROM FORMER LUST CASE NO. 900450216. LAXFUEL-BFSF-TRANSFERRED FROM FORMER LUST CASE NO. 900450161. THIS IS PART OF THE LAX BULK FUEL STORAGE FACILITY. LAXFUEL-BFSF-TRANSFERRED FROM FORMER LUST CASE NO. 900450098. LAXFUEL-BFSF-TRANSFERRED FROM FORMER LUST CASE NO. 900450170. DISCOVERED DURING SOIL TESTING FOR MONITORING WELL. JET "A" FUEL NOH ISSUED 3/22/88 FOR SITE ASSESSMENT. SAME SITE REFER TO SLIC #303A-LAXFUEL-BFSF Former UST Case No. 900450207, GeoTracker No. T0603701046

Potential Media Affected:	Aquifer used for drinking water supply, Other Groundwater (uses other than drinking water), Soil Vapor
Potential Contaminants of Concern:	1,1,1-Trichloroethane (TCA), 1,4-Dioxane, Dichloroethane (DCA), Dichloroethene (DCE), Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Vinyl chloride
Site History:	Site Background The site is a 20-acre commercial paved parking facility adjacent to the Los Angeles International Airport (LAX) and is owned by Los Angeles World Airports (LAWA). From 1941 to 1988, the Site was used for aerospace manufacturing. A total of 13 underground storage tanks (USTs) were previously used at the facility to store petroleum products, waste oil and spent solvents. As a result of the former aerospace operations and chemicals previously used and/or stored at the site, soil, soil vapor and groundwater have been impacted with petroleum hydrocarbons and halogenated volatile organic compounds (VOCs), primarily 1,1,1-trichloroethane (1,1,1-TCA), trichloroethene (TCE) and 1,1-dichloroethene (1,1-DCE); and 1,4-dioxane. The Site lies within the West Coast Groundwater Basin of the Los Angeles Coastal Plain. According to the California Department of Water Resources Bulletin 104, the Site is underlain by non-marine alluvial sediments of the Upper Pleistocene Lakewood Formation, which includes unconsolidated coarse-grained sands and gravels of the Semiperched aquifer and poorly sorted sands, silty clays and clays of the Bellflower aquitard. The Bellflower aquitard is underlain by the Gage aquifer, which consists primarily of fine to medium sand with variable amounts of gravel, sandy silt and clay. The Lakewood Formation is underlain by alluvial and marine deposits of the San Pedro Formation, which includes the Lynwood and Silverado aquifers. Subsurface lithology at the Site generally consists of unconsolidated and partially interbedded fine to coarse-grained sands and silty sands alternating with very fine-grained silts and clays from the

HONEYWELL INTERNATIONAL INC (Continued) **1000249111**

surface to 177 feet below ground surface (bgs), the total depth investigated. Groundwater beneath the Site occurs as three discontinuous perched fine-grained sandy zones at approximately 40-50, 74-75, and 92-97 feet bgs and occurs under continuous unconfined conditions within the Gage aquifer, which extends from approximately 95-135 feet bgs. Groundwater flow in the Gage aquifer has consistently been towards the east. Site Characterization and Groundwater Monitoring The Site has been under environmental investigation since 1989 and under Regional Board regulatory oversight since 1994. In 1989, TA Gleason Associates conducted an initial site investigation of 30 areas of concern and 80 potential sources onsite. A total of ninety-seven soil borings (70 shallow, 27 deep) and six monitoring wells were installed. Shallow soil was impacted with VOCs (TCE, 1,1-DCE, and 1,1,1-TCA) and petroleum hydrocarbons, with up to 63 milligrams per kilogram (mg/kg) total VOCs and 14,000 mg/kg total petroleum hydrocarbons (TPH). Most contamination was in the Northwest Quadrant (NWQ). During the 1990s multiple Phase II and III onsite and offsite investigations were conducted to characterize the Site and identify the nature and extent of the soil and groundwater contamination. In 1995, six multi-depth soil vapor probes (MLG-1 through MLG-6) were installed. The soil vapor probes confirmed that VOCs contamination in soil extends vertically to the base of the vadose zone and the highest concentrations have historically been at depths > 65 feet bgs. In 2006 during an approved soil re-baseline sampling event, maximum soil vapor concentrations detected were 420,000 micrograms per liter (a%g/L) 1,1-DCE, 1,400,000 a%g/L 1,1,1-TCA and 42,000 a%g/L TCE. The highest soil vapor concentrations were detected in MLG-1 located near MW-1 at 75 feet bgs. Groundwater monitoring has been conducted at the site since 1997, primarily on a semi-annual basis. Currently, 17 wells are screened at various depths within the perched zones, 53 wells are screened in the upper Gage aquifer and one well (MW-204) is screened in the lower Gage aquifer. Three wells are screened within a deeper water-bearing zone at 150-160 feet bgs (DMW-1) and at 169-174 feet bgs (DWM-2 and DWM-3). Historical data from DMW-1 and initial groundwater data from DMW-2 and DMW-3 indicate that both VOCs and 1,4-dioxane were non-detect (ND) above their respective reporting limits. Soil Remediation During 1990-1991, soil excavation was conducted to address shallow soil contamination. Approximately 20 excavations site-wide were conducted from the surface soils to depths up to 30 feet bgs. The largest of these excavations was in the NWQ near a former oil/water separator. That excavation was approximately 12,000 square feet in area and extended to a depth of 25 feet bgs. Soil vapor extraction (SVE) remediation has been conducted extensively at the Site. VOCs-impacted soils onsite have been subjected to two major SVE operations: Site-wide and NWQ SVE systems. An extensive site-wide SVE remediation system using 80 extraction wells and a 5,000-standard cubic feet per minute (SCFM) system operated from September 1990 to October 1991 on soils up to 65 feet bgs and removed approximately 100,000 pounds of VOCs. In 1997, vapor enhanced recovery (VER) and in-well air stripping (IWAS) pilot tests were conducted to evaluate these technologies' ability to dewater select perched zones and remove vapor-phase VOCs from the dewatered perched zones. Based on the results of the pilot testing, a full-scale SVE/VER system was installed in the NWQ and began operating in March 2000. The NWQ SVE system has operated intermittently from 2000-2010 and has removed approximately 32,800

HONEYWELL INTERNATIONAL INC (Continued) **1000249111**

pounds of VOCs. During that period, extracted vapors were treated using a variety of methods including catalytic oxidation, refrigeration/condensation, and granular activated carbon (GAC). On March 30, 2010, the NWQSVE system was shut down based on asymptotic VOCs removal trends and to evaluate long term rebound in order to optimize the system. Prior to shutdown, soil vapor sampling was conducted from 21 locations at depths > 65 feet below ground surface (bgs). The results showed that VOCs concentrations, while still elevated, decreased up to three orders of magnitude lower than the October 2006 rebaseline sampling event. In 2011 and 2012, the NWQ SVE system was operated intermittently for 779 and 1,064 hours, respectively, during the second quarter, and 870 hours during the third quarter of 2013 to evaluate long term rebound trends. Since the third quarter of 2013, the NWQ SVE system has remained off. Results of the intermittent SVE operation and associated soil vapor sampling indicate similar mass removal rates over three consecutive years (2011 - 2013). Similar removal rates were encountered during the most recent long-term SVE operations during 2009-2010, just prior to rebound testing and intermittent SVE operations. A few weeks of SVE operations thus yields approximately the same amount of VOCs mass as does continuous SVE operation. Soil confirmation sampling results from the March 30, 2012 "Soil and Groundwater Investigation Report" indicates that residual VOCs soil occur primarily within fine-grained soil. These observations suggest that SVE remediation at the site is currently behaving as a diffusion-limited system and continuous SVE operation is no longer necessary or cost-effective at this site. Combined SVE operations at the site have removed a total of 134,000 pounds of VOCs to date. In their December 20, 2012 "Soil Vapor Extraction System Operation Plan", AMEC recommended that the SVE system remain shut off and that soil vapor samples be collected at six month intervals to monitor the need for additional SVE operation. Soil vapor concentrations will be compared with equilibrium soil vapor concentration calculated from recent groundwater monitoring data. If soil vapor concentrations show a potential to impact groundwater, then the SVE system will be restarted to remove VOCs from soil vapor. Groundwater Remedy Evaluation and Additional Assessment In 2005, limited bench-scale testing of source area groundwater was conducted using advanced oxidation processes (AOP) including ultraviolet light and ozone, and bioremediation treatment. Results indicated that AOP might be a viable cleanup method, whereas bioremediation did not appear suitable. A more comprehensive yet preliminary evaluation of potential remediation technologies was provided in an August 31, 2012 technical memo prepared by AMEC. Many of the proposed technologies that appear suitable will be re-evaluated by Honeywell prior to the final remedy selection. In-situ remediation method require a thorough understanding of the subsurface lithology and contaminant distribution in the suspected "hot spot" or source area near MW-1 as well as that of upgradient and downgradient locations. Honeywell is in the process of evaluating these data. In addition to the technology screening, representatives from Rice University (with concurrence from Honeywell) are in the process of conducting a bench-scale biodegredation study to determine if,4-dioxane concentrations in groundwater beneath the site and offsite are naturally biodegrading.The results of this study could have a profound impact on future remedy selection for sites with moderate to high concentrations of 1,4-dioxane. Between November 2011 and January 2012, five soil borings and five cluster groundwater

HONEYWELL INTERNATIONAL INC (Continued) **1000249111**

monitoring wells were installed in and around the MW-1 hot spot in order to evaluate potential residual sources of 1,4-dioxane and VOCs in soil and groundwater, assist in the evaluation of soil and groundwater remediation technologies, and evaluate subsurface lithologies to determine why high 1,4-dioxane concentrations are not detected immediately downgradient of the site. Results of this investigation indicate that the hot spot and downgradient onsite contamination are connected. The investigation also revealed the presence of a significant fine-grained zone within the saturated zone that appears to limit vertical migration of VOCs and 1,4-dioxane (concentrations are higher above the zone than below). The report recommended the installation of deeper wells downgradient of the hot spot to further evaluate potential vertical impacts below the Gage aquifer. In addition, the report recommended that select wells be destroyed that are screened across the fine-grained zone and or defective wells. From December 2012 through January 2013, two deep groundwater monitoring wells (DMW-2 and DMW-3) were installed onsite downgradient of the hot spot. During this time period, three existing wells MW-106, MW-109 and MW-1 were destroyed due to well defects and improperly screened intervals (MW-1) Results from historical site investigations and groundwater monitoring to date indicate that groundwater characterization within the perched zones and Gage aquifer beneath the Site is essentially complete. However, based on historical and recent groundwater monitoring data from offsite wells, the lateral and vertical extent of dissolved-phase VOCs and 1,4-dioxane in groundwater downgradient (east of the Site) within the Gage aquifer has not been fully delineated. Honeywell in currently in the process of conducting an offsite groundwater investigation is to further delineate the lateral and vertical extent of VOCs and 1,4-dioxane in groundwater within the Gage aquifer downgradient (east) of the Site. Results of this investigation will help to better define the plume offsite so that an offsite remediation and/or containment strategy can be developed. In August and September 2015, Honeywell conducted aquifer testing and onsite downgradient pilot scale treatability testing along the eastern site boundary. This work was conducted in general accordance with a March 30, 2015 "Work Plan for Aquifer Testing and Pilot Testing of Groundwater Treatment Technologies" that was approved by the Regional Board in a staff letter dated July 22, 2015. The workplan proposed the installation of one groundwater extraction well (EW-1) and two piezometers (PZ-1 and PZ-2) to monitor drawdown and recovery responses from aquifer testing to determine hydraulic properties of the aquifer (e.g., transmissivity, storativity, etc.). During the aquifer testing, extracted groundwater will be treated onsite using two above-ground treatment technologies: advanced oxidation process (AOP) and adsorption. Advanced oxidation involved the application of ultraviolet (UV) light and hydrogen peroxide (H2O2). Most of the extracted groundwater was treated using the AOP system and discharged to a storm drain under a NPDES permit. A portion of the extracted groundwater was treated using a pilot-scale Ambersorb treatment system. Ambersorb is a synthetic resin that had a high adsorbtion capacity for 1,4-dioxane as well as VOCs in groundwater. In Late September, 2015, the pilot testing was completed and the eastern portion of the site was restored to it’s normal operations as a paved commercial parking lot for the Los Angeles International Airport (LAX). Results of the aquifer and pilot testing will be presented in a report to be submitted to the Regional Board in January 2016.

HONEYWELL INTERNATIONAL INC (Continued) **1000249111**

Honeywell intends to perform in-situ chemical oxidation (ISCO) bench-scale testing on samples collected during the installation of the extraction well and piezometers. The bench testing will evaluate the effectiveness on activated persulfate as an oxidant to reduce the VOCs and 1,4-dioxane. The ISCO work plan will be submitted to the Regional Board for review in early 2016. As of September 2016, Honeywell is currently in the process of conducting an additional offsite downgradient groundwater investigation in an attempt to delineate the eastern terminus of their VOCs and 1,4-dioxane plume. Amec Foster Wheeler, Honeywell's consultant, submitted a work plan for this investigation dated April 29, 2016. The Regional Board approved the work plan with comments in a letter dated September 2, 2016. The Regional Board also issued a work notification of this work in late August 2016 that Honeywell's consultant distributed to nearby businesses and residents. The field work involves drilling and sampling at potentially up to three offsite locations to locate the lateral and vertical extent of the plume. Detailed analysis of the various soil types is being conducted by the field geologist and through geophysical electrical logging methods. Groundwater samples are being collected and analyzed at multiple depth intervals to evaluate the contaminant profile. It is anticipated that a new offsite groundwater monitoring well will be installed in one of these locations based on the vertical groundwater sampling results. A report of these activities is due to the Regional Board on or before January 31, 2017.

CONTINENTAL AIRLINE AIRCRAFT MAINTENANCE FACILITY (ACMX) - C (Continued) **S116741922**

Case Type:	Cleanup Program Site
Case Worker:	CMC
Local Agency:	Not reported
RB Case Number:	0349A
File Location:	Regional Board
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil, Under Investigation
Potential Contaminants of Concern:	1,1,1-Trichloroethane (TCA), Other Solvent or Non-Petroleum Hydrocarbon, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Aviation
Site History:	The discharger has completed several phases of site assessment for soil, soil gas, and groundwater. The discharger reported a jet fuel release of approximately 4,000,000 gallons. In 2005 a Vacuum-Enhanced Free Product Recovery System (VEFPRS) began operating to recover jet fuel. Several phases of well installation were completed and presently the VEFPRS consists of 221 recovery wells. To date approximately 800,000 gallons of jet fuel have been removed. The discharger is also assessing HVOC impacts in soil and groundwater near the northeastern edge of the jet fuel plume. Los Angeles World Airports (LAWA) is assessing an adjacent off-Site HVOC plume on the southwestern edge of the jet fuel plume. Site remediation efforts are being coordinated with LAWA.

RB Case Number:	0349A
File Location:	Regional Board
Potential Media Affected:	Soil, Soil Vapor
Potential Contaminants of Concern:	1,1,1-Trichloroethane (TCA), Other Solvent or Non-Petroleum Hydrocarbon, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Chromium, Other Metal, Aviation
Site History:	The discharger has completed several phases of site assessment for soil, soil gas, and groundwater. The discharger reported a jet fuel release of approximately 4,000,000 gallons. In 2005 a Vacuum-Enhanced Free Product Recovery System (VEFPRS) began operating to recover jet fuel. Several phases of well installation were completed and presently the VEFPRS consists of 221 recovery wells. To date approximately 800,000 gallons of jet fuel have been removed. The discharger is also assessing HVOC impacts in soil and groundwater near the northeastern edge of the jet fuel plume. Los Angeles World Airports (LAWA) is assessing an adjacent off-Site HVOC plume on the southwestern edge of the jet fuel plume. Site remediation efforts are being coordinated with LAWA.

Potential Contaminants of Concern: 1,1,1-Trichloroethane (TCA), Other Solvent or Non-Petroleum Hydrocarbon, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Chromium, Other Metal, Aviation
Site History: The discharger has completed several phases of site assessment for soil, soil gas, and groundwater. The discharger reported a jet fuel release of approximately 4,000,000 gallons. In 2005 a Vacuum-Enhanced Free Product Recovery System (VEFPRS) began operating to recover jet fuel. Several phases of well installation were completed and presently the VEFPRS consists of 221 recovery wells. To date approximately 800,000 gallons of jet fuel have been removed. The discharger is also assessing HVOC impacts in soil and groundwater near the northeastern edge of the jet fuel plume. Los Angeles World Airports (LAWA) is assessing an adjacent off-Site HVOC plume on the southwestern edge of the jet fuel plume. Site remediation efforts are being coordinated with LAWA.

Description:	Unknown cause per the R/P. Per R/P contact responder at 213-725-6313 Howard Wong. Its a blockage from roots infiltrating the sewer line. It is still flowing out, 10-15 gallons ppm. Appears to be draining into a storm drain culvert on LAX propertyy. This is right next to a runway and responders need to get special access to the airport. It has entered the Los Angeles storm drain system.

Preparer of Incident Report:	Carrier
Description of Events:	Shipment under AWB217-47436815 51pcs/492kg UN2800 Batteries wet non-spillable Class 8 51 Fibreboard Boxes X 9.50kg Packing Instruction 872 from BKK to LAX on flight TG692/11April 2015. Loaded in ULD number AKE91670TG. Upon breakdown of the container at about 0630am 12 April at the Thai Cargo warehouse 1 box of the above shipment was found tipped on its side and apparently leaking (box appeared wet and crushed). Damaged box was removed and loaded upright(it stopped leaking) separated from the other cargo in the warehouse DGR area. Four boxes from three other shipments were wet from the leaking box. warehouse staff cleaned up the spill but two boxes(paper wrapped and cardboard) were wet from the battery acid. All the affected customers were informed of the leaked material (battery acid). Only one customer rejected their package (magazines). The damaged DGR box was not braced within the container to prevent tipping (all DGR boxes had orientation arrow markings). The box appeared to be crushed on one end but this may have been as a result of the fiberboard being soaked and deformed by the weight of the battery. I called FAA Special Agent Security and Hazardous Material Safety Karen Yoneda on 13April who came to the warehouse to inspect the damaged box. The battery was unpacked from the outer 4G box and inner retial fiberboard box. There were no apparent signs of damage(cracks holes separation) to the battery. The top of the battery was still wet around the filler caps. The acid level was about 1.5 inches below the low fluid level mark on the battery(there was still acid in all the cells).
Recommendations/Actions Taken:	All DGR boxes must be loaded to prevent shifting or tipping during ground and air transport. This may require bracing and blocking using straps shrink wrap or other braced cargo etc.
Recommendations/Actions:	All DGR boxes must be loaded to prevent shifting or tipping during ground and air transport. This may require bracing and blocking using straps shrink wrap or other braced cargo etc.

Description of Events:	2pca of Lithium Ion Batteries were loaded onto a 10FT Unit Load Device (ULD). The ULD was taken out to the ramp side to be staged before loading into the aircraft. A ULD transporter was used to move the ULD onto a static rack. The driver positioned the transporter against the static rack and moved the ULD on to the rackby the transporters mechanism. The driver got distracted and forgot to engage the locking mechanism on the rack. When reversing the driver moved about 10 feet away from the rack. When the driver turned to look in the direction of the rack the ULD proceeded to slide off the rack as it was not locked. The ULD with the two pieces slowly slide off the rack landing on the ground. No leakage or release of the inner contents. The two pieces were placed upright. No damage to the pieces was visible. The pieces were offloaled to be return to the shipper.
Recommendations/Actions Taken:	A memo of the situation will be circulate with all staff regarding the confirmation of engaging locking mechanisms on static racks. Addtional training will be required for the all staff which handle ULD to be loaded on static racks. A reminder will be placed on the static racks and possibly on the transporters reminding staff of confirming the locking mechanism is engage.
Recommendations/Actions:	A memo of the situation will be circulate with all staff regarding the confirmation of engaging locking mechanisms on static racks. Addtional training will be required for the all staff which handle ULD

Preparer of Incident Report:	Carrier
Description of Events:	During export operation one piece of RCM UN1814 was dropped from a distance of about 24 and landed on it's side. The inner contents leaked about 0.2 L onto the floor. Area was clear out and package place on up-right position to control leakage. Package was not tranported and return to shipper for inspection.

Preparer of Incident Report:	Carrier
Description of Events:	While stacking DG cargo onto a skid one box fell to the ground from about 4 high. Upon recovery it was noticed the leakage had occurred. Cargo was isolated and leakaged contained. Area was clean up and package returned to shipper. During investigation it was noted that outer package suffer no damages however inner package can cover burst open due to no cushion material was utilize and cap locking pins were very weak.
Recommendations/Actions Taken:	Staff have been reminded to ensure same size boxes are not stacked more then two layers hihg and secure with shrink wrap at every 30 to ensure cargo collapsing will not occurred. Shipper was advise to prepare cargo with better inner material and better locking pins to prevent leakage for small mis-handles during the handling process.
Recommendations/Actions:	Staff have been reminded to ensure same size boxes are not stacked more then two layers hihg and secure with shrink wrap at every 30 to ensure cargo collapsing will not occurred. Shipper was advise to prepare cargo with better inner material and better locking pins to prevent leakage for small mis-handles during the handling process.

Preparer of Incident Report:	Carrier
Description of Events:	On 07Mar14 at 22:46 while stacking DG cargo onto a plastic skid warehouse agent was strainghen up the load and three boxes fell to the ground from a distance of 4ft. Cargo was immediately place on up-right position and upon inspection it was noted that one package had leaked white substance. Agent informed the management team to inspect the package. It was found that the inner package was dented which caused the inner containers top to open and release the paint liquid. It is estimated that about 0.0L of the liquid was released.
Recommendations/Actions Taken:	During investigation it was found that inner packages did not had sufficient cushion material and secondary means of closure were small lock clips which were not able to keep lid closed under the drop pressure. Warehouse personell have been remided about exercising extra caution when staking DG cargo and to apply shink wrap at every 30 inchs to avoid shipmetn collapsing during stacking process.
Recommendations/Actions:	During investigation it was found that inner packages did not had sufficient cushion material and secondary means of closure were small lock clips which were not able to keep lid closed under the drop pressure. Warehouse personell have been remided about exercising extra caution when staking DG cargo and to apply shink wrap at every 30 inchs to avoid shipmetn collapsing during stacking process.

Preparer of Incident Report:	Carrier
Description of Events:	Upon acceptance of USPS mail warehouse agent noted one package with Lithium Battery Handling label. As per KZ operator variation DG cargo will not be accepted on mail. One piece of Mail with Lithium Battery Handling was returned to USPS/LAX.
Recommendations/Actions Taken:	USPS staff must be able to recognize DG cargo during processing of mail and determine if carrier can or cannot carry DG cargo as mail.

Description of Events:	On June 6th 2012 at 08:15 warehouse agent was in the process of breaking down an ULD. Upon picking up one carton (CN 26) warehouse agent noticed that the box was wet from the bottom and isolated the box then notified to Supervisor on duty. All the other boxes were checked and found an additional three boxes wet from the bottom. All four boxes were isolated and absorbent material was place on the bottom to reduce leakage. Upon close inspection it was found that one inner jerrican from CN 26 had been punctured by sharp staple used to close the box bottom. Other three boxes were wet damage from the exposure to the leakage from CN 26. Total leakage is about 4 fluid onces.
Recommendations/Actions Taken:	During investigation it was found the bottom side of the box was not

6501 WEST IMPERIAL HIGHWAY (Continued) **2012113072**

	protected by extra cardboard the staple used to secure the bottom side was sticking up and puncture the metal jerrican. In case metal staples are used it will be recommended to ensure to place layers of cardboard to protect the inn
Recommendations/Actions:	During investigation it was found the bottom side of the box was not protected by extra cardboard the staple used to secure the bottom side was sticking up and puncture the metal jerrican. In case metal staples are used it will be recommended to ensure to place layers of cardboard to protect the inn

Description of Events:	On January 16th at 18:53 warehouse agent was in the process of loading MAWB 217-3158 7382 into ULD. During the process warehouse agent removed the strech film (shrink-wrap). To facilitate that loading warehouse agent decided to move the skid with cargo closer to the ULD. Upon moving the skid one layer of boxes (12 boxes)collapsed and fell to the ground. Cargo was immediately picked up and place on up-right position. During this process it was found that four boxes were leaking paint. Damaged boxes was issolated and inner packaging was inspected. Leakage product was clean with absorbent material/sand. Leakage amount was about 0.4 Liters.
Recommendations/Actions Taken:	During the inspection it was found that inner packages did not had sufficient cushion and absorbent material. Also it did not had

Preparer of Incident Report:	Carrier
Description of Events:	Upon build up of MAWB 933-91857382 warehouse agent noticed one box whihch was loaded on skid with RNG label. Warehouse agent reported to Supervisor and after research it was found that MAWB did not indicate any DG cargo. Cargo was not loaded and returned to shipper agent for review.
Recommendations/Actions Taken:	Shipper Agent warehouse staff must pay more attention to ensure no hidden DG is givin to the air carrier for transportation. Shipper agent must be able to recognize DG cargo and separate it from general consolidations.
Recommendations/Actions:	Shipper Agent warehouse staff must pay more attention to ensure no hidden DG is givin to the air carrier for transportation. Shipper agent must be able to recognize DG cargo and separate it from general consolidations.

Description:	RP states that a contractor tapped an LA Fitness sewage line into the storm drain line on Sept 20, intact through Oct 22 resulting in the direct release of an unknown amount of sewage into the storm drain system. The piping has been corrected and it is unknown where the storm drain system leads to.

UNITED AIRLINES INC (Continued) **1000399389**

File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply
Potential Contaminants of Concern: Aviation
Site History: A review of Regional Board files indicates the presence of Volatile Organic Compounds (VOCs) and petroleum hydrocarbons in the soil and groundwater. Several environmental investigations to assess the VOCs and petroleum hydrocarbons soil have been conducted. Groundwater assessment of VOCs and petroleum hydrocarbons has been conducted by sampling a series of onsite groundwater monitoring wells. The subject site is leased from the LAWA by United Air Lines (UAL). UAL operates a Maintenance Operations Center (MOC) at the Los Angeles International Airport (LAX). The MOC contains two hangars used for light aircraft and vehicle maintenance, three underground storage tanks (USTs), six active clarifiers, a network of floor drains and collection trenches, triturator, an inactive, closed-in-place jet fuel hydrant system, various other aboveground or underground features (i.e., paint spray booths, hazardous storage areas, etc.). The areas of concern within the MOC include; two hangars used for light aircraft and vehicle maintenance, three underground storage tanks (USTs), six active clarifiers, a network of floor drains and collection trenches, triturator, an inactive, closed-in-place jet fuel hydrant system, various other aboveground or underground features (i.e., paint spray booths, hazardous storage areas, etc.). In 2004, LAWA, which administers LAX on behalf of the City of Los Angeles, requested UAL investigate the source of floating product measured by LAWAs consultant in one of the monitoring wells (MW-1) installed at the MOC during a previous investigation. In response, UAL conducted groundwater monitoring and product recovery by hand bailing, and prepared a workplan for additional site characterization. The workplan was submitted to LAWA and the Regional Board in September 2004. The workplan was approved and the following elements were completed as part of the investigation at the subject site: Eight areas with elevated shallow soil vapor concentrations have been identified. Five anomalies were based on chlorinated volatile organic compounds (CVOCs) and are located in Areas A through E, and three were based on TVPH (Areas F through H). The presence of VOC and/or TPH in soil and groundwater within these areas is summarized below: Soil and groundwater have been evaluated at Areas A, C, and F. Soil within these areas does not contain significant VOC or TPH impacts nor is groundwater impacted by the vadose zone constituents in these areas. Area B is the only study area with confirmed impacts to both soil and groundwater including free floating product (TPH) and elevated chlorinated VOCs in groundwater. Free product recovery is ongoing. Soil and groundwater sampling has been conducted in Areas D and E. Soils underlying Area G are impacted by TPH but the impact does not extend to groundwater. Soils underlying Area H impacted by TPH, it is not known whether these impacts are just in vadose zone; groundwater impacts have not been confirmed. Groundwater underlying the subject site is impacted with chlorinated VOCs (i.e., TCE) ranging from 1.2 to 880 a%g/L. The source of the chlorinated VOCs is Area B. Downgradient TCE concentrations have not ye been fully evaluated. Concentrations detected along the upgradient property boundary have ranged from 1.2 to 71 a%g/L. Floating hydrocarbon product observed in MW-1 and -9 consists of relatively unweathered mineral spirits, which do not contain an appreciable fraction of either jet fuel or diesel. Approximately 1,530 gallons of product have been removed at a

UNITED AIRLINES INC (Continued) **1000399389**

recovery rate of 2 gph.

Preparer of Incident Report:	Carrier
Description of Events:	Upon breakdown of shipper built cookie sheet / PMC Singapore airlines warehouse staff discovered this 4 cartons having the lithium ion section II handling label affixed to all 4 cartons however the MAWB given by the shipper states that the shipment did not contained lithium ion batteries section II at all.
Recommendations/Actions Taken:	Singapore head quarter and Hazmat bureau of the cargo airline were notified intermediately the shipper in HKG was suspended and they are not allowed to tender any hazmat to us until this case is closed and resolved. Authorities in Singapore and Hongkong were also informed accordingly.

Preparer of Incident Report:	Carrier
Description of Events:	It was reported to us by our offices in Seoul Korea (ICN). Upon arrival check from our GHA the staff found undeclared DG shipment from 618-60409640 under HAWB-MSP50591439 T1K15 ADHESIVE (CAO) from LAX. The ground handling agent immediately reported to us and we passed the all details to origin station. On 06OCT GCO18 origin station (LAX) finally confirmed this cargo is undeclared DG after investigated by SHIPPER (KUEHNE & NAGEL INC).

Remarks:

ON 03/23/01 ANSETT AIR FREIGHT SHIPPED A CONSOLIDATION SHIPMENT CONTAINING
TWO HOUSES BILLS ON FLIGHT UA848 FROM MEL TO LAX. SHIPMENT WAS LISTED AS
AIRCRAFT PARTS AND NOT DECLARED AS DANGEROUS GOODS. AT APPROX 2300 ON 03/28/01 RUSSO TRUCKING ARRIVED TO PICK UP HOUSE BILL NUMBER VEA120602.
WHEN THE BOX WAS PLACED ON THE TRUCK THE DRIVER TURNED IT ON ITS SIDE TO
INSPECT THE FRIGHT AND THE BOX STARTED LEAKING A FUEL LIKE SUBSTANCE. THE
DRIVER CALLED HIS SUPERVISOR AND WAS ADVISED TO REFUSE IT. THE UAL AGENT
AT THE FRONT DOOR THEN CALLED HIS SUPERVISOR JEFF ARNOLD WHO REMOVED THE
BOX TO A SECURE AND CLEANED UP THE SPILL. SUBSEQUENTLY SUPERVISOR ARNOLD
OPENED THE BOX AND FOUND WARRANTY REPAIR FORM LISTING @2 ENGINE MAIN FUEL
CONTROL LEAKING ADJACENT TO PLA INPUT SHAFT" BOX IS 22KG CARDBOARD WITH
STYROFOAM PEANUTS.

Description of Events:	AWB 001AKL50037315 of 1 wooden skid containing a total of 70 wireless headsets flew on AA82/24NOV from AKLLAX. While loading on the connecting flight AA04/25NOV from LAXJFK the ramp refused it because the boxes had shifted and it was no longer loadable. The cargo CSM inspected the black shrink-wrapped skid and noticed a Lithium Ion Battery Handling label affixed to one of the inner boxes and initiated the notification process.

Preparer of Incident Report:	Carrier
Description of Events:	This morning Matt Calloway found a undeclared DG for FLT 4JFK I asked him how he caught it and he stated he went in to the planning office to advise where the DG was loaded and they told him there was no DG I pulled the box pelican case and it had a big sticker right on top and I opened it and found 3 laptops inside I powered one up and it started right up I pulled the paperwork and it does not state anything about lithium batteries The box is sitting over in the DG area I ad Shaun contact the customer to advise the shipment will not be going as planned.
Recommendations/Actions Taken:	I had a documented discussion with the agent that received the shipment. She is aware that she needs check to make sure auto notoc is entered when it comes to DG.
Recommendations/Actions:	I had a documented discussion with the agent that received the shipment. She is aware that she needs check to make sure auto notoc is entered when it comes to DG.

Description of Events:	During the acceptance process when the acceptance clerk removed the shrink wrap to affix the AA label to each of the 12 fibreboard boxes she discovered that all 12 boxes where labeled with the Lithium Ion Battery Mark and the Shipper failed to declare it on the airwaybill. She immediately contacted the manager on duty to start the notification process for undeclared dangerous goods. During the notification process the shipper sent new documents reflecting the correct Lithium Ion Batteries Section II statement. We advised the shipper that FAA is being notified and we have placed a hold on their shipment until FAA authorizes AA to release the shipment. Manager on duty opened the boxes and discovered 10 Samsung Galaxy E Tab in each of the 12 boxes. The customer (AIT- Anastasia Suesue) has been contacted her contact information is Office:310-538-4383 ext:3324 Cell:310-974-2866 Email: asuesue@aitworldwide.com
Recommendations/Actions Taken:	We have recognized the acceptance clerk for being vigilant during the acceptance process and that she plays a big role when it comes to safety. We also advised the shipper that we take these incidents seriously.

Remarks:

AIRCRAFT ENGINE PART WAS PACKED IN A FIBERBOARD BOX WITH STYROFOAM INSERTS
BOX A PART WAS IN PLASTIC BAG. WHEN THE FREIGHT ARRIVED AT THE CARGO WAREHOUSE A STRONG ODOR OF GASOLINE WAS NOTICED. THE AGENT LOOKED UNDER
THE BOX AND NOTICED A LEAK. HE THEN NOTIFIED ME. I OPENED THE BOX AND OBSERVED AN AIRCRAFT PART WRAPPED IN PLASTIC AND LIQUID POOLED IN THE BOTTOM. THERE WAS NO INDICATION ON THE BOX OR DOCUMENTS THAT THIS PART WAS
DECLARED AS DANGEROUS GOODS. I THEN NOTIFIED UAL HEADQUARTERS AND THE TSA.
WHEN THE TSA ARRIVED WE OPENED THE SECOND BOX OF THE HOUSE BILL AND FOUND A
SECOND AIRCRAFT PART THAT HAD ALSO LEAKED IN THE PLASTIC BAG INSIDE. THIS
HOUSE BILL WAS PART OF A LARGER CONSOLIDATION.

Description:	RP states that a driver of a tractor trailer hit a concrete barrier which ruptured the saddle tank resulting in the release of 25 gallons of diesel. Caller states that 2 gallons of the release impacted asphalt and the rest was secured in buckets. The release is contained and cleanup is underway. No waterways have been impacted.

Description:	Caller states the auto-shutoff failed on dispenser #9 which resulted in the release of substance to asphalt only. Caller states there was a citizen who had a drop of the substance go into her eye so an employee at the gas station brought her in and flushed her eye out. The citizen then said she was feeling better and left. On-site personnel then used SM186 to clean up substance.

Name:	LOS ANGELES WORLD AIRPORTS - NATIONAL CAR RENTAL (FORMER AVIS)
Address:	9419 AIRPORT BLVD
City,State,Zip:	WESTCHESTER, CA 90045
Region:	STATE
Facility Status:	**Open - Remediation**
Status Date:	07/15/2009
Global Id:	T0603701065
Lead Agency:	LOS ANGELES RWQCB (REGION 4)
Lead Agency Case Number:	Not reported
Latitude:	33.9520044514165
Longitude:	-118.387059584656
Case Type:	Cleanup Program Site
Case Worker:	CMC
Local Agency:	Not reported
RB Case Number:	1325B
File Location:	Regional Board
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	Trichloroethylene (TCE), Gasoline, Total Petroleum Hydrocarbons (TPH)
Site History:	Case transferred from Underground Storage Tank (UST) Pprogram to Site Cleanup Program (SCP) for regional Board oversight as requested by Los Angeles World Airports letter dated November 17, 2015.

Preparer other function:	Not reported

Description of Events:

Cargo came in on NW914/31Aug our codeshare partner. When our ground handler went to pick up the cargo,hedetected a strange odor. In total there were 4 aircraft pallets being picked up from NW. He checked around thepallets, but did not find or visually see anything unusual. The condition on the ramp side of NW airlines were dark(around 2345hrs) and since there were many aircraft equipment and the aircraft next to our cargo, he assumedtheodor was not coming from our cargo. He signed off the cargo about 2355hrs and proceeded to transport the 4 units toour warehouse, which is aboutIO minutes away using the airport service road. Upon breakdown, apparent forkliftdamage was found. One of the dangerous goods was found leaking and two other of the same shipment appeared tobe damaged. The warehouse ground handlers notified JAL management at which time all personnel were toevacuated from the warehouse. JAL management notified LAFD, APO POLICE, Airport Authorities and left phonemessage with FAA.Warehouse main doors were left open to keep fumes from collecting in one area. LAFD HAZMATdepartment afterinvestigation and checking documentation gave okay to resume operation, but to keep infected areacleared untilproper HAZMAT clean-up/disposal was hired to clean up and dispose of damaged hazardous material.

Recommendations/Actions Taken to Prevent Future Incidents:

Additional training will be given to our warehouse handlers on the acceptance of hazardous materials and what signsto check for. Also, refresher/reminder training will be given on handling of hazardous material (safety) andemergency response. We forwarded all the information to our NW Airlines, our code share partner for investigationpurpose regarding this incident. - Will forward hard copies via mail
of: a. This reportb. airway bill copy c. dangerous goods declarationd. our emergency medical report regarding one of our staff-possibleexposure to fumes. Immediate release after evaluation. e. documentation-Uniform
Hazardous Waste Manifest Disposal ** Will forward FD Report nbr/Police Report nbr when received.**
